NOTIFICATION OF ELECTION

(PCT Rule 61.2)

Commissioner

US Department of Commerce

United States Patent and Trademark

Office, PCT

2011 South Clark Place Room

CP2/5C24

Date of mailing (day/month/year) 18 December 2000 (18.12.00)	ETATS-UNIS D'AMERIQUE in its capacity as elected Office		
International application No. PCT/US00/05928	Applicant's or agent's file reference 365.300		
International filing date (day/month/year)	Priority date (day/month/year)		
08 March 2000 (08.03.00) Applicant	30 April 1999 (30.04.99)		
PIZZA, Mariagrazia et al	,		

1.	The designated Office is hereby notified of its election made:
	X in the demand filed with the International Preliminary Examining Authority on:
	22 November 2000 (22.11.00)
	in a notice effecting later election filed with the International Bureau on:
2.	The election X was
-	was not
	made before the expiration of 19 months from the priority date or, where Rule 32 applies, within the time limit under Rule 32.2(b).

The International Bureau of WIPO 34, chemin des Colombettes 1211 Geneva 20, Switzerland

Authorized officer

Nestor Santesso

6 The figure of the drawings to be pub X as suggested by the appl because the applicant fai	lished with the abstract is Figure No.	None of the figures.

Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)	
This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:	
1 X Claims Nos.: 16,17 (partly) because they relate to subject matter hot required to be searched by this Authority, namely:	
Rule $39.1(v)$ PCT - Presentation of information (insofar as related to computer databases)	
2 X Claims Nos.: 5,6,15 (completely), 1-4, 7-14, 16-24 (partly) because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:	
see FURTHER INFORMATION sheet PCT/ISA/210	
3. Claims Nos.:	
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).	
Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)	
This International Searching Authority found multiple inventions in this international application, as follows:	
As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.	
2 As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.	
3 As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos:	
4. No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:	
restricted to the invention mat mentioned in the claims, it is covered by claims noc	
Remark on Protest The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.	

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box I.2

Claims Nos.: 5,6,15 (completely), 1-4, 7-14, 16-24 (partly)

- 1) Claims 5 and 6 (and thus 15 which refers to claim 6 and whose reference to claims 7 and 8 is wrong) lack any essential technical feature which could allow a meaningful search to be carried out. They have thus not been searched. For the same reason claims 18-24 have not been searched insofar as referring to any of claims 5, 6 and 15.
- 2) Claims 1-4, 7-14, 16-24 have only been searched insofar as related to the full sequence SEQ ID 1 in view of the absence of any indication in the claims as to searcheable SEQ IDs corresponding to the "NMB open reading frames". SEQ ID 1 as such is not searchable by means of similarity algorithms since it is too long: the search with respect thereto has thus been carried out based on keywords.
- 3) A further reason for not searching claims 1-4 insofar as related to "NMB open reading frames" is that claim 1 is unclear (Art. 6 PCT). It relates to a method for searching open reading frames "within one or more...NMB open reading frames", which is however technically meaningless.

The applicant's attention is drawn to the fact that claims, or parts of claims, relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure.

International Application No /US 00/05**9**28

a. classification of subject matter IPC 7 C12Q1/68 C12N15/11

VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted: see separate sheet

VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made: see separate sheet

EXAMINATION REPORT - SEPARATE SHEET

Re Item I

Basis of the opinion

- 1) Sequence listing pages 1-750 filed with the letter of 22/6/00 do not form part of the application (Rule 13ter.1(f) PCT).
- 2) Appendix A has been filed along with the application, however is not part of the description (Art. 3(2) PCT); it should therefore be changed into a figure or be deleted along with any reference thereto.

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

- 1) Claims 5, 6 and 15 have not been searched and thus no opinion will be given with respect to whether their subject-matter meets the requirements of Art. 33 PCT. The same applies for claims 18-24 insofar as related to any of claims 5, 6, and 15.
- 2) Claims 1-4, 7-14, 18-24 have only been searched insofar as relating to SEQ ID 1 and will therefore be examined on the basis this limitation.
- 3) Claim 24 relates to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of this claim (Article 34(4)(a)(i) PCT).
- 4) Claims 16 and 17 have not been searched insofar as related to computer databases and will thus not be examined with respect to this feature.

INTERNATIONAL PRELIMINARY **EXAMINATION REPORT - SEPARATE SHEET**

Claims 1-4 lack novelty (Art. 33(2) PCT).

Re Item V

2)

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

- D1 (EP-A-467714) and D2 (WO-A-9817805) disclose the purification of the entire 1) genomic DNA of N. Meningitidis (see D1, ex. 3 and claims, D2, ex. 2, p. 54, l. 2-16, claims). They do not however disclose a sequence as that of SEQ ID 1, to which claims 7 and 8 relate. The subject-matter of the said claims is thus novel (Art. 33(2) PCT).
- D1 (see p. 5, I. 28-40, ex. 3 and claims) discloses the cloning and the expression of the DNA coding for a N. meningitidis B protein from whole genomic DNA. D2 discloses various N. Meningitidis B ORFs (identified by means of nucleotide sequencing) and proteins encoded thereby (see p. 13, l. 2-p. 17, l. 3, ex. 1 and 2). Hence, both documents are based on a search for ORFs or protein-coding sequences within SEQ ID 1 and therefore anticipate the subject-matter of claim 1.

The fact that the whole of the said sequence was not available does not mean that the search has not been carried out within the said sequence: it is assumed that the ORFs disclosed in the prior art as exemplified by D1 and D2 are to be found in the said sequence.

The same applies to claim 2, since identifying the initiation and termination codons is inherent in the definition of an ORF.

Claim 3 lacks novelty over D1 which discloses the cloning and expression of a N. Meningitidis protein.

The identification of a N. Meningitidis protein by means of an antibody recognising it is disclosed in D1, p. 44, l. 5-18, or D2, p. 33, l. 12-p. 40, l. 14: thus also claim 4 lacks novelty.

3) Claims 9-14,16-24 lack novelty (Art. 33(2) PCT). SEQ ID 1 represents allegedly the full genomic sequence of N. Meningitidis. Both D1 and D2 disclose N. meningitidis proteins and nucleic acid fragments encoding them. They both use PCR to amplify a portion of the Neisseria genome. Moreover, the fragments disclosed in D2 show no homology to any known gene (p. 51, l. 30-p. 52, l. 6) (as to claim 10, see also item VIII hereinbelow).

EXAMINATION REPORT - SEPARATE SHEET

Both D1 and D2, thus, anticipate the subject-matter of claims 9-15 and 18-23 in that they disclose fragments of the N. Meningitidis genome, probes, proteins, antibodies, compositions containing them and diagnostic uses thereof (see aforementioned passages).

Moreover, D1 discloses the therapeutic use of a N. Meningitidis protein and thus anticipates the subject-matter of claim 24.

- 4) Claims 16 and 17 lack novelty because a sequence contained in a computer, a computer memory or a computer storage medium is not a technical feature of the said products. Hence, any computer, computer memory or storage medium takes away the novelty of claims 16 and 17 (see also item VIII.2 hereinbelow).
- 5) Claims 7 and 8 lack an inventive step (Art. 33(3) PCT). Independent of the assessment of the scientific merit of the sequencing work, and of the laboriousness and time required to achieve the result of sequencing the N. Meningitidis genome, no inventive merit can be acknowledged for the sequence SEQ ID 1 because it is the result of the direct application of standard, computerised techniques known in the art at the priority date of the application (see Science, v. 269, p. 496-512, 1995, p. 496, col. 3, l. 19-p. 508, col. 1, last full par.).
- 4) For the assessment of the present claims 22-24 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.

Re Item VII

Certain defects in the international application

Only published documents should be referred to in the application (Guidelines, II, 1)

EXAMINATION REPORT - SEPARATE SHEET

Re item VIII

- 1) Claims 5, 6, 15 lack any technical feature and contravene thus the clarity requirement of Art. 6 PCT.
- 2) Claims 22-24 lack support (Art. 6 PCT) and their subject-matter contravenes Art. 5 PCT due to the absence of any example whatsoever as to a therapeutic application of the claimed sequence SEQ ID 1 or of any of the proteins or antibodies to which the claims relate.
- 3) Claim 10 lacks support (Art. 6 PCT) since no fragments of SEQ ID 1 or 1068 unique to N. Meningitidis are disclosed in the application. Moreover, the claim lacks clarity (Art. 6 PCT) because it merely relates to a desideratum without relating to any technical feature (e.g. a sequence) which would allow the obtention of the sought result.
- 4) Claim 20 lacks clarity (Art. 6 PCT) because SEQ ID 1 (which is longer than 2 x 106 bp (or a sequence having greater than 50% sequence identity therewith) cannot be used as a primer. Its reference to claims 7 and 8 should thus be deleted.

IMPORTANT NOTIFICATION

International application No. PCT/US00/05928

International filing date (day/month/year) 08/03/2000

Priority date (day/month/year) 30/04/1999

Applicant

CHIRON CORPORATION et al.

- 1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The following defects in the form or contents of the international application have been noted: see separate sheet

VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made: see separate sheet

Re Item I

Basis of the opinion

- 1) Sequence listing pages 1-750 filed with the letter of 22/6/00 do not form part of the application (Rule 13^{ter}.1(f) PCT).
- 2) Appendix A has been filed along with the application, however is not part of the description (Art. 3(2) PCT); it should therefore be changed into a figure or be deleted along with any reference thereto.

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

- Claims 5, 6 and 15 have not been searched and thus no opinion will be given with respect to whether their subject-matter meets the requirements of Art. 33 PCT.
 The same applies for claims 18-24 insofar as related to any of claims 5, 6, and 15.
- 2) Claims 1-4, 7-14, 18-24 have only been searched insofar as relating to SEQ ID 1 and will therefore be examined on the basis this limitation.
- 3) Claim 24 relates to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of this claim (Article 34(4)(a)(i) PCT).
- 4) Claims 16 and 17 have not been searched insofar as related to computer databases and will thus not be examined with respect to this feature.

()

Re Item V

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

- 1) D1 (EP-A-467714) and D2 (WO-A-9817805) disclose the purification of the entire genomic DNA of N. Meningitidis (see D1, ex. 3 and claims, D2, ex. 2, p. 54, l. 2-16, claims). They do not however disclose a sequence as that of SEQ ID 1, to which claims 7 and 8 relate. The subject-matter of the said claims is thus novel (Art. 33(2) PCT).
- Claims 1-4 lack novelty (Art. 33(2) PCT).
 D1 (see p. 5, I. 28-40, ex. 3 and claims) discloses the cloning and the expression of the DNA coding for a N. meningitidis B protein from whole genomic DNA. D2 discloses various N. Meningitidis B ORFs (identified by means of nucleotide sequencing) and proteins encoded thereby (see p. 13, I. 2-p. 17, I. 3, ex. 1 and 2). Hence, both documents are based on a search for ORFs or protein-coding sequences within SEQ ID 1 and therefore anticipate the subject-matter of claim 1. The fact that the whole of the said sequence was not available does not mean that the search has not been carried out within the said sequence: it is assumed that the ORFs disclosed in the prior art as exemplified by D1 and D2 are to be found in the said sequence.

The same applies to claim 2, since identifying the initiation and termination codons is inherent in the definition of an ORF.

Claim 3 lacks novelty over D1 which discloses the cloning and expression of a N. Meningitidis protein.

The identification of a N. Meningitidis protein by means of an antibody recognising it is disclosed in D1, p. 44, l. 5-18, or D2, p. 33, l. 12-p. 40, l. 14: thus also claim 4 lacks novelty.

3) Claims 9-14,16-24 lack novelty (Art. 33(2) PCT). SEQ ID 1 represents allegedly the full genomic sequence of N. Meningitidis. Both D1 and D2 disclose N. meningitidis proteins and nucleic acid fragments encoding them. They both use PCR to amplify a portion of the Neisseria genome. Moreover, the fragments disclosed in D2 show no homology to any known gene (p. 51, l. 30-p. 52, l. 6) (as to claim 10, see also item VIII hereinbelow). Both D1 and D2, thus, anticipate the subject-matter of claims 9-15 and 18-23 in that they disclose fragments of the N. Meningitidis genome, probes, proteins, antibodies, compositions containing them and diagnostic uses thereof (see aforementioned passages).

Moreover, D1 discloses the therapeutic use of a N. Meningitidis protein and thus anticipates the subject-matter of claim 24.

- 4) Claims 16 and 17 lack novelty because a sequence contained in a computer, a computer memory or a computer storage medium is not a technical feature of the said products. Hence, any computer, computer memory or storage medium takes away the novelty of claims 16 and 17 (see also item VIII.2 hereinbelow).
- 5) Claims 7 and 8 lack an inventive step (Art. 33(3) PCT). Independent of the assessment of the scientific merit of the sequencing work, and of the laboriousness and time required to achieve the result of sequencing the N. Meningitidis genome, no inventive merit can be acknowledged for the sequence SEQ ID 1 because it is the result of the direct application of standard, computerised techniques known in the art at the priority date of the application (see Science, v. 269, p. 496-512, 1995, p. 496, col. 3, l. 19-p. 508, col. 1, last full par.).
- 4) For the assessment of the present claims 22-24 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.

Re Item VII

Certain defects in the international application

1) Only published documents should be referred to in the application (Guidelines, II,

4.17): citations such as those on p. 45, l. 6-7 or p. 46, l. 6-7 should thus be either deleted or amended.

Re item VIII

- 1) Claims 5, 6, 15 lack any technical feature and contravene thus the clarity requirement of Art. 6 PCT.
- 2) Claims 22-24 lack support (Art. 6 PCT) and their subject-matter contravenes Art. 5 PCT due to the absence of any example whatsoever as to a therapeutic application of the claimed sequence SEQ ID 1 or of any of the proteins or antibodies to which the claims relate.
- 3) Claim 10 lacks support (Art. 6 PCT) since no fragments of SEQ ID 1 or 1068 unique to N. Meningitidis are disclosed in the application. Moreover, the claim lacks clarity (Art. 6 PCT) because it merely relates to a *desideratum* without relating to any technical feature (e.g. a sequence) which would allow the obtention of the sought result.
- 4) Claim 20 lacks clarity (Art. 6 PCT) because SEQ ID 1 (which is longer than 2 x 10⁶ bp (or a sequence having greater than 50% sequence identity therewith) cannot be used as a primer. Its reference to claims 7 and 8 should thus be deleted.
